

The MASH Approach to Breast Cancer et al.*

* (these same concepts apply to ALS, immune system dis-orders and dis-eases of the dopamine synapse, such as depression, alcoholism, and Parkinsons dis-ease)

"Finish the Dance"

Estrogen-Induced Sequence (EIS)

Chromosome 21

THEME

Stimulus - Re-ceptor - Re-sponse

An Old Individual Experience (Old Blue in the grid) functions as a stimulus akin to an antigen or estrogen as a promoter/inducer of a gene on DNA.

The Re-ceptor (window 3) can be the breast itself, an immune cell, or window 3 in the grid.

The Re-sponse (Old Green in the Grid) is the gene on DNA.

Prior Roles from Old Stories (Old Green in the grid) can re-sound or re-sonate with certain genes on DNA, which are also Prior Roles.

CONNECTION TO PLACE
